

MOOD BOARD

I was fascinated with this particular theme of colours and created this digital mood board. I added flowers and model figures to study different silhouettes. I also incorporated a colour palette to understand various tones and hues.

MOOD BOARD

The mood board has inspired me to make a collection based on a woman going on a business trip in a tranquil environment to a small Greek island, Santorini. I wanted to depict a scenario in which she might need elegant suits, a hint of luxurious Business Casual style for when she would be attending business parties. My designs can be worn in spring-summer because fabric like silk and crepe are appropriate for this weather and the colours complement the surroundings of the environment such as the soothing white walls and the deep blue Mediterranean waters of Greece.

POLYESTER CREPE

SYNTHETIC FIBRE
POLYESTER

RAW SILK (DUPION)

Fibroin - 70-75 %
sericine - 20-25 %
WAXY SUBSTANCE - 2-3 %
NATURAL COLOURS - 1-1.5 %
